Circuits for Emerging Applications: Devices, Circuits, and Systems 34

Editors:

- Muhammad Mustafa Hussain
- Muhammad Ali Imran
- Muhammad Younus

Description:

This book presents the latest research in the fields of electronic circuits, devices, and systems. It includes a wide range of topics, such as circuit design, analysis, and optimization; semiconductor devices; VLSI design; power electronics; renewable energy systems; and biomedical circuits. The book is a valuable resource for researchers, students, and professionals in the field of electrical and electronic engineering.

Contents:

Audience:

This book is intended for researchers, students, and professionals in the field of electrical and electronic engineering.

VLSI: Circuits for Emerging Applications (Devices, Circuits, and Systems Book 34) by Dirk V. Arnold

4 out of 5

Benefits:

- Provides a comprehensive overview of the latest research in the fields of electronic circuits, devices, and systems.
- Includes a wide range of topics, such as circuit design, analysis, and optimization; semiconductor devices; VLSI design; power electronics; renewable energy systems; and biomedical circuits.
- Is a valuable resource for researchers, students, and professionals in the field of electrical and electronic engineering.

Publication Details:

Publisher: Springer

Publication Date: 2023

: 978-3-031-09060-7

Pages: 500

Author Biographies:

Muhammad Mustafa Hussain is an Associate Professor in the Department of Electrical Engineering at the University of Engineering and Technology, Lahore, Pakistan. He received his PhD degree in Electrical Engineering from the University of Southampton, UK, in 2013. His research interests include circuit design, analysis, and optimization; VLSI design; and power electronics.

Muhammad Ali Imran is a Professor in the Department of Electrical and Computer Engineering at the University of Waterloo, Canada. He received his PhD degree in Electrical Engineering from the University of California, Berkeley, USA, in 2006. His research interests include wireless communications, signal processing, and machine learning.

Muhammad Younus is a Professor in the Department of Electrical Engineering at the University of Engineering and Technology, Lahore, Pakistan. He received his PhD degree in Electrical Engineering from the University of Manchester, UK, in 1995. His research interests include power electronics, renewable energy systems, and control systems.
